Diagnostic check: six questions, 10 minutes

Answer without consulting the course. Indicate the questions for which assistance is required. diagnostic check is not graded.

1. Develop ($x-3)^2$.

2. Factoring x^2-16.

3. Resolve ($x-2)(x+5)=0$.

4. Solve x^2 = 9 in $\mathbb{R}$.

5. Give the sign of 2 $x-6$.

6. Determine the minimum of ($x-1)^2+4$.

After the diagnostic check. Retrieve the concepts indicated with the teacher; repeat a question and then explain the rule used.

Speaking and reasoning. Present two methods for factoring a trinomial.
All three cases were identified and explained why they were exhaustive.

Search before formalizing

A rectangle has an area of 24 m ^{2} and a perimeter of 20 m. Without randomly trying all the to determine its sides. Start with a drawing and explain the two constraints.

Organization. Individual research 5 min, confrontation 2 5 min, pooling 5 min.
Keep a trace of a test, even if not completed. A conjecture must then be justified.
