Diagnostic check: six questions, 10 minutes

Answer without consulting the course. Indicate the questions for which assistance is required. diagnostic check is not graded.

1. Simplify 2 $^{3} \times 2^{4}$.

2. Express 3 $^{-2}$.

3. Resolve 2 $x + 1 = 5$.

4. Derivating $x^2 + 2x$.

5. A decrease of 20% gives what coefficient?

6. For a geometric sequence $u_0 = 5, q = 2$, calculate u_n.

After the diagnostic check. Retrieve the concepts indicated with the teacher; repeat a question and then explain the rule used.

Speaking and reasoning. Explain the difference between continuous rate and discrete multiplier coefficient; present an inequality proved by minimum difference.

Search before formalizing

Compare the increments of e^x and the values of the function around 0, with several steps
Build three stages of Euler and explain the chosen rule.

Organization. Individual research 5 min, confrontation 2 5 min, pooling 5 min.
Keep a trace of a test, even if not completed. A conjecture must then be justified.
