Diagnostic check: six questions, 10 minutes

Answer without consulting the course. Indicate the questions for which assistance is required. diagnostic check is not graded.

1. Perimeter of a circle of radius 1 ?

2. How many degrees is a quarter of a turn worth?

3. Calculate $\sqrt{\frac{1}{2}}$.

4. Abscess and ordinate of the symmetrical of $(a; b)$ in relation to the axis of the apses?

5. Simplify $\frac{5\pi}{3} - 2\pi$.

6. In a right triangle, opposite side 3 and hypotenuse 5: sine?

After the diagnostic check. Retrieve the concepts indicated with the teacher; repeat a question and then explain the rule used.

Speaking and reasoning. Present an associated equality of angles by naming the symmetry that justifies it; explain what a radian measures.

Search before formalizing

Build, without rapporteur, a corner point $\frac{\pi}{3}$ then a corner point $\frac{\pi}{4}$. Justify the exact values their coordinates from the figures.

Organization. Individual research 5 min, confrontation 2 5 min, pooling 5 min.
Keep a trace of a test, even if not completed. A conjecture must then be justified.
