Start-of-lesson routines - Mathematics 2G

school year 2026-2027 - Student edition

Each sheet has five questions to do in seven minutes, without a calculator unless stated.
Questions 4 and 5 return to ideas already met: they help you
remember what you have already learnt. Always show your method, even for mental calculation.

Contents

1 Vectors in the plane 1

2 Lines in the plane 2

3 Real numbers and intervals 4

4 Functions: representations and reference functions 5

5 One-variable descriptive statistics 7

6 Algebraic calculation, equations and inequalities 9

7 Proportions and changes 11

8 Variations and extrema of a function 12

9 Cross-tabulating two categorical variables 13

10 Coordinate geometry: vectors and lines 15

11 Synthesis problems, reasoning and fluency 16

12 Probability: conditioning and weighted trees 17

13 Consolidation, fluency and transition to Première 19

14 Annual review and consolidation of Seconde 21

Vectors in the plane

Sheet 1 Thu. 8 Oct. 2026 Distance between two points and the midpoint of a segment

1. Warm-up · Flash Calculate $(-3)^2$, $(5-(-2))^2$ & -3^2.

2. Core · Method $A(1;2)$ and $B(4;6)$ in an orthonormal coordinate system. Give the coordinates of $\overrightarrow{AB}$ then the distance AB.

3. Core + · MCQ The midpoint of $[AB]$ with $A(-2;1)$ and $B(4;-3)$ has coordinates:

A. $(1;-1)$ **B.** $(-1;1)$ **C.** $(2;-2)$ **D.** $(3;-2)$

4. Review · Flash Calculate $3x^2-2x+1$ for $x=-2$.

5. Running thread · Flash Solve in $\mathbb{R}$: $3x+5=17$.
